

Care Through Telemedicine

Trust Curavi for the very best senior care

Care for you with telemedicine

The Jewish Home of Eastern Pennsylvania is dedicated to our residents well-being. Through Curavi telemedicine and team of doctors, the Jewish Home can connect you with a doctor anytime during after-hours. You can discuss concerns and treatment options with a doctor who is geriatric trained and specializes in post-acute care.

What is telemedicine?

- Live and interactive communication between you, a nurse, and a doctor, through the use of a secure video at your bedside.
- With the help of a nurse, the doctor uses a portable system that contains audio, video, and diagnostic devices to see, talk to, and examine you remotely.

What are the benefits?

- Quick treatment from the Curavi doctor, potentially avoiding a transfer to the hospital or doctor's office.
- Evaluation from a doctor who treats you in the comfort of your surroundings.

Privacy and security of your personal health information is our top priority at Curavi Health. We do not record your visit. Your health records are stored according to federal HIPAA regulations and shared with your nursing home after a consult.

How It Works

Your community uses Curavi technology, which is a portable medical system that can be brought right to your room to virtually connect you with a Curavi doctor to evaluate, diagnose, and treat you.

1 Nurse recognizes you are in need

2 Nurse calls Curavi or schedules a consult

3 You, the nurse, and your doctor discuss your concerns

“I feel like I’m part of the future!”

“I can’t believe the doctor is on the TV!”

What Residents Are Saying

“I’m glad you’re doing this. It was helpful.”

“I’m so glad you can be there for me.”

A Note from Jewish Home of Eastern Pennsylvania

We have partnered with Curavi Health to provide the best care after-hours. With Curavi, we allow their team of specialized doctors to see, hear, and speak to our residents through secure telemedicine technology. This allows our residents to be treated by doctors who are trained in geriatric care so residents can stay in the comfort of their own room - potentially avoiding an unnecessary trip to the hospital. Curavi specializes in post-acute care with an over 94% treat in place rate.
