

Curavi Telemedicine: A Partner for the Jewish Home

The seamless integration of our telemedicine technology into your facility enhances care for patients. Our simple and intuitive telemedicine solution is designed for residents' PCPs to use from any device while providing the clinical capabilities to make a confident diagnosis.

After-hours, Curavi provides access to our high-quality physician network to address any clinical needs. By directly connecting your staff members to our providers, we deliver instant access to clinical decision makers and help avoid unneeded transfers to the hospital.

At Curavi, all we do is deliver clinical care in post-acute and senior living facilities. Our clinical expertise allows us to treat your residents in place, giving your staff, residents and family members the peace of mind that care is always just a call away.

Benefits to Partnering with Curavi

Clinical Benefits

- Avoid unnecessary trips to the hospital
- Industry leading clinical outcomes with a treat-in-place rate of 96%
- Designed for your residents' PCPs or specialists to easily provide consults
- Ensure continuity of care as consult summary is immediately provided back to the facility and PCP
- Improved care provided to residents

Facility Benefits

- Peace of mind for staff knowing they have 24/7 direct access to physicians
- Better health outcomes for residents and reduced risk for facility
- Increase and maintain occupancy
- Ongoing staff training and 24/7/365 customer service
- Dedicated Client Success Manager to help ensure success

Resident Benefits

- Peace of mind, knowing that timely care improves health outcomes
- Avoid transfers to the hospital, reducing risk of infections like COVID-19
- Decrease patient confusion and anxiety by providing care in a familiar place
- Enhanced physician to family communication
- 24/7 access to clinical care

Curavi Health Maintains Your Residents' Comfort and Dignity

Facilities using Curavi Physicians have a 96% treat-in-place rate

By treating in place and preventing transfer, residents avoid disruptions to their routine, encounter less confusion, are exposed to fewer risks such as COVID-19, and experience better health outcomes.

By treating at home, a resident's chances of a debilitating hospital or SNF stay are reduced. Combined with 24/7 immediate access to clinical care, Curavi allows residents to stay in Assisted Living longer.

Curavi's Value
